## **MEDIA ALERT**

### **Westfalia to Highlight Palletless Automated Car Parking System at New York Build 2018**

**York, Pa.** – February 15, 2018 – [Westfalia](#), a leading supplier of automated parking systems worldwide, will highlight its palletless automated parking solutions that are uniquely designed for mixed-use, residential and commercial parking at booth #105 during New York Build 2018, March 19-20 at the Javits Center in New York, NY.

The growing number of vehicles on the road combined with limited space availability, especially in urban areas, has created a need for parking garages to have greater storage density. Local governments, developers and architects continue to search for solutions to this complex problem when considering new building projects. Westfalia's automated parking systems help meet parking demand while providing an aesthetically appealing, environmentally friendly alternative that requires 40 percent less space than traditional parking garages.

**DETAILS:**
