## **Westfalia to Highlight Palletless Automated Car Parking System at Texas Society of Architects Annual Conference & Design Expo**

**WHAT:**

With more than 350 exhibitors, the TxA Design Expo is the premier architectural products showcase in the Southwest. The 80th Annual Conference and Design Expo, themed “Immersion,” will feature keynote speakers, continuing education sessions, tours, the largest architectural products showcase in the Southwest, and events for architects at all stages of their career. Collect your annual CE credits, mingle with friends and colleagues, and learn about new products and services in the industry.

**WHO:**

[Westfalia Technologies, Inc.](#), a leading supplier of automated parking systems worldwide, will highlight its palletless automated parking solutions that are uniquely designed for mixed-use, residential and commercial parking at booth 1309 during the annual TxA Design Expo.

Westfalia realizes that the growing number of vehicles on the road combined with limited space availability, especially in urban areas, has created a need for parking garages to have greater storage density. Local governments, developers and architects continue to search for solutions to this complex problem when considering new building projects. Westfalia’s automated parking systems help meet parking demand while providing an aesthetically appealing, environmentally friendly alternative that requires 40 percent less space than traditional parking garages.

**WHERE:**

Booth 1309  
Moody Gardens Hotel and Convention Center  
Galveston, Texas

**WHEN:**

Thursday, Oct. 24, 3:30 pm – 7:00 pm  
Friday, Oct. 25, 11:00 pm – 5:00 pm

**ADDITIONAL RESOURCES:**

To those who are interested in expanding their knowledge in automated parking systems, Westfalia is offering [free Lunch and Learn](#) continuing education sessions after the conference. The 60-minute presentation-style sessions will be hosted at your company’s facility and will be led by Ian Todd, Westfalia’s Director of Automated

Parking. The goal is to help motivate employees while creating a workplace of communication, collaboration and learning. Participants will learn how automated systems are changing the future of parking with lowered emissions, space savings, user safety, labor savings and energy savings, as well as the benefits of a turnkey approach to specifying such a system in a project.

**FOR MEDIA INFORMATION:**

Please contact Claire Kelly. She can be reached at 240-686-1000 or by email [claire@dprgroup.com](mailto:claire@dprgroup.com). A representative from Westfalia will be available for interviews before, during and after the event.

**FOR ATTENDEES:**

For more information and to register, please go to the conference website:
